

Autodesk Designathon 2026

COMPETITION BRIEF
18 July 2026

Design brief

Marcus manages the emergency response logistics for an international aid organization.

Following a natural disaster, access to clean water and personal sanitation becomes the most critical need for displaced communities.

Marcus has a brief for you:

Design a compact, rapidly deployable, and sustainable hygiene station where people can wash their hands, access filtered water, and maintain basic personal hygiene in challenging environments.

Requirements

Technical requirements:

- The model must be designed within a specified area of 2m x 2m.
- Your model must feature a water storage unit designed for the easy connection and integration of 19-liter carboys or 2.5-liter bottles (these models will be provided to you).
- Enhance your model quality through realistic assembly connections and manufacturing details (fasteners, fillets/chamfers).
- Your model must use realistic materials from the Fusion material library (e.g., aluminum/plastic/wood...).

Functional requirements

- Your model must include a dedicated filtration area capable of purifying contaminated water for safe use (**Note:** only conceptual/visual modeling of the filtration system is required; physical functionality is not needed).
- Your model must feature a storage area to contain wastewater.
- Your model must feature a washing station that allows at least two individuals to wash their hands at the same time.

Competition guidelines

- **Team collaboration:** the components of the project (such as the filtration system, the tank structures, and the external shell) should be individually modeled by team members. You must collaborate with your teammates to ensure all parts fit together.
- **Originality:** each part of the design must be modeled from scratch using Autodesk Fusion. Feel free to use McMaster-Carr, TraceParts, or the Insert Fastener option in Fusion to add fasteners to your design. **Using any external 3d model is not allowed per the competition terms.**
- **Project starter:** you must use the provided competition starter file in Fusion, <https://a360.co/4wEZQRq>.

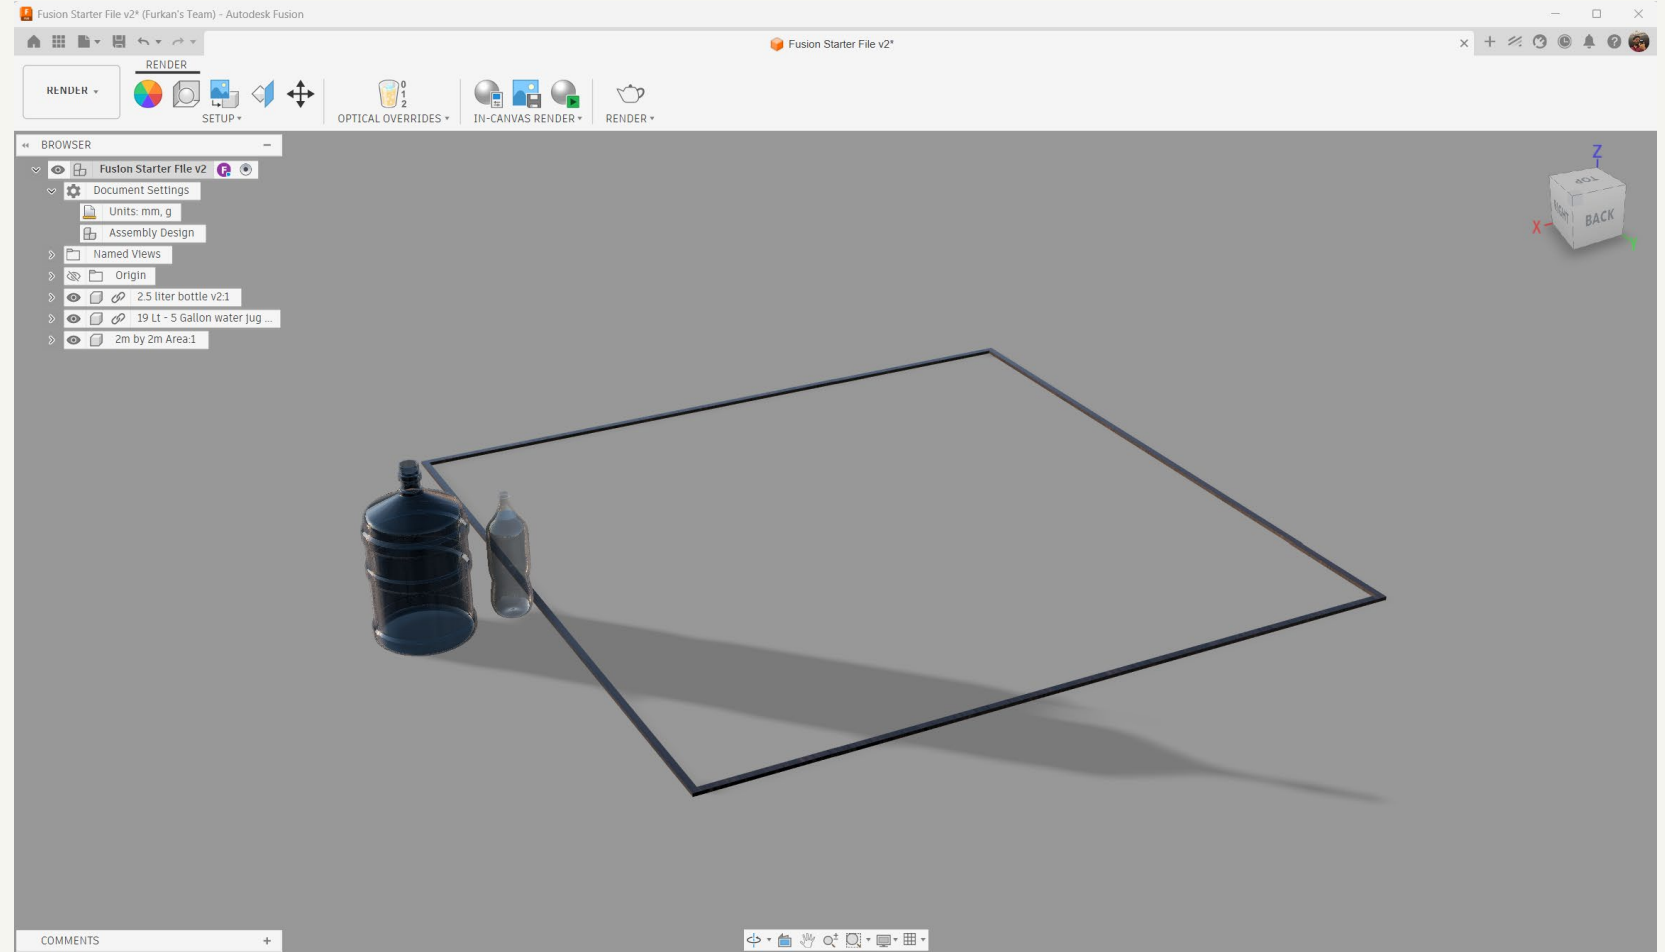

Fusion project starter model

You can download it and begin working on the model. You can also access the model (.f3d file) through the Discord channel.

You will see 3 different models within the file:

- A 19-liter water carboy
- A 2.5-liter water bottle
- A 2m x 2m workspace limit area

You are required to use the 19-Liter water carboy or the 2.5-liter water bottles at least once, as they represent easily accessible water transport tools during disasters.

Example designs

Shared to explain the competition requirements only. The jury will assess how well your designs meet the requirements.

Incorporates the requirements

Questions from the jury: is it easy to transport?

Good demonstration of the filtration system

Questions from the jury: does it have a waste water unit?

Realistic design

Questions from the jury: does it allow two people to wash their hands at the same time?

Designathon project evaluation criteria

Your team's project submission will be assessed by the jury based on three main criteria that are weighted into a total score.

The jury will select 3 winning teams with honourable mentions.

Model integrity and originality

Creativity and uniqueness of your design.

You can do research and examine examples, but your final design should be a unique solution.

40%

Detail level and efficiency

How well your design fits the given brief.

Whether the model includes sufficient components and detail to meet the design requirements.

30%

Aesthetics and visual quality

Quality, visual appearance and material selections of your design.

The aesthetics of the design will be evaluated based on the project links you share.

Submit your project

- Choose **one representative** for your team and submit your finalized project through this Google Form:
<https://forms.gle/FwVVskHxz1YwMvnE6>
- **To submit**, take the following actions:
 1. Use “Share File Link” > “Yes to share latest version with anyone without password” in Fusion to get a link to the assembled 3D model, which you will share in the Google Form.
 2. Write a short summary explaining your project (recommended 2 – 3 paragraphs) that you will enter in the Google Form.
- Submit your project by **19:00 BST** at the latest. Submissions made after this time will not be considered by the jury.
Note: Once you have submitted your projects, never make any changes to the Fusion files!

Countries	Local time
California	10:00 (am)
Costa Rica	11:00 (am)
Burkina Faso, Côte d'Ivoire, Ghana, Mauritania	18:00
Benin, Cameroon, Chad, Nigeria, Tunisia, United Kingdom	19:00
South Africa	20:00
Egypt, Kenya, Türkiye, Uganda, Ukraine, Yemen	21:00
United Arab Emirates	22:00
Pakistan	23:00
India	23:30
Bangladesh	00:00
Indonesia, Vietnam	01:00
Hong Kong, Singapore	02:00

Submit your project

Form: <https://forms.gle/FwVVskHzx1YwMvnE6>

Step 1: Confirm your team's contact information.

Team information

Please re-confirm your team's name and contact details.

Team Name *
(Confirm your team name in English)

Your answer

Country *

Choose

Team member 1: Full name *

Your answer

Team member 1: Email address *

Your answer

Team member 2: Full name *

Step 2: Upload the link to your design and provide a description.

Project submission

Please fill in the following fields to submit your Designathon project to the jury.

Please add the Autodesk Fusion link for your project *
You retrieve this by choosing "Share File Link" in the Fusion platform. Do not make any changes to your work until the competition results are announced!

Your answer

Please provide a description of your project *
Include a short description of 3-4 paragraphs that explains how your submission responds to the criteria in the design brief. This will help the jury evaluate your project.

Your answer

I confirm on our team's behalf that our submission adheres to the competition terms and condition. *

Access the terms and conditions [here](#).

☐ Yes

Step 3: We'd appreciate some quick feedback on the event!

Feedback

We'd appreciate your input on the following three questions to help us plan future events.

How satisfied were you with the Designathon?
(Please rate on a scale 1 - 5)

1 2 3 4 5

Not satisfied ☐ ☐ ☐ ☐ ☐ Very satisfied

How likely are you to attend a future Designathon?
(Please rate on a scale 1 - 5)

1 2 3 4 5

Unlikely ☐ ☐ ☐ ☐ ☐ Very likely

Do you have any suggestions or other feedback that you would like to share?

Your answer

Back **Submit** Clear form

Don't forget to submit!

Questions and support

Discord

Join our Discord server at
<https://discord.gg/ZZ3sDrSzBR>

General channel for
announcements and updates
during the event

Each team will be assigned a
private channel to ask questions
and collaborate

Zoom

We will keep the Zoom
meeting open in case you
encounter any problems
with using Discord. Use the
chat in that case.

No more presentations
once we have finished.

Email

Anytime

Send an email to our
helpdesk if you have
questions about the
organization/timings, etc.
